Easily share or download files while keeping track of them in a friendly interface with the help of this powerful, yet easy to use application. Having your PC connected to the Internet is enough for you to generate Internet traffic the second your OS boots up. Itâ??s really not necessary to open your browser and willingly download something in order for your computer to send and receive packets. While not all of these packets are easily manageable, anyone can manage the downloads and uploads of their own choice.
