Microsoft Office is a leading software suite for work, learning, and creative tasks.

Microsoft Office ranks as one of the most trusted and widely used office software worldwide, including all essential tools for effective handling of documents, spreadsheets, presentations, and beyond.

Appropriate for both work environments and routine tasks â?? in your house, school, or work premises.

What is contained in the Microsoft Office package?

Microsoft Publisher

Microsoft Publisher is an easy-to-understand and budget-friendly desktop layout software, that is focused on creating professional-looking printed and digital materials refrain from using complicated graphic software. Unlike standard text manipulation tools, publisher grants users increased flexibility for element alignment and visual design. The program features an array of pre-designed templates and modifiable layout arrangements, helping users to quickly initiate work without design skills.

Power BI

Power BI is Microsoftâ??s advanced platform for business intelligence and visual data analysis created to organize fragmented information into coherent, interactive reports and dashboards. The tool is focused on analysts and data experts, for general users who prefer understandable tools for analysis without complex technical background. Thanks to the cloud service Power BI, reports are published with ease, updated and accessible from any part of the world on multiple devices.
