Microsoft Publisher

Microsoft Publisher is an easy-to-use, budget-friendly desktop layout program, centered on creating visually compelling print and digital materials you donâ??t have to use elaborate graphic software. Unlike typical text editing programs, publisher provides more flexibility in positioning elements accurately and designing layouts. The program offers a variety of ready-made templates and customizable layouts, that assist users in starting their tasks rapidly without design expertise.

Microsoft Teams

Microsoft Teams is a dynamic platform for communication, teamwork, and video calls, created as a versatile tool for teams of all sizes. She has become a cornerstone of the Microsoft 365 ecosystem, integrating chats, calls, meetings, file exchanges, and other service integrations into one workspace. The central idea of Teams is to offer users a single digital hub for all their needs, an environment to communicate, organize, meet, and edit documents collaboratively, without leaving the app.

Skype for Business

Skype for Business is a corporate platform for communication and online collaboration, integrating all-in-one solution for instant messaging, voice and video calls, conferencing, and file sharing under a single safety measure. Evolved from Skype to better serve corporate communication needs, this solution was aimed at helping companies communicate more effectively inside and outside the organization considering corporate security, management, and integration requirements with other IT systems.
