Update date: 2026-02-14

- **Processor:** Dual-core CPU for activator
- **RAM:** Minimum 4 GB
- **Disk space:** 64 GB for patching

AnyDesk is a small program for fast and secure remote computer control. It allows remote computer management from any location with minimal delay. It includes features like file transfer, session recording, remote printing, and cross-platform compatibility. It relies on DeskRT codec and powerful encryption to ensure secure connections. Suitable for IT support, remote work, and cooperative tasks. Respected for speed, reliability, and ease of operation.
