Last modification: 2026-04-14

Verify

- **Processor: 1 GHz processor needed**
- **RAM:** Enough for patching
- **Disk space:** 64 GB for crack

Keep your PC in good shape with various tools that clean junk files, repair registries, remove applications or even bring back deleted files. Going through an uninstallation process does not always get the job properly done. Most of the times files with no further use are left behind and registries can get broken or invalid. However, there are specially designed applications like AVG PC TuneUp, formerly known as TuneUp Utilities, that help you clean the computer for a little extra boost in performance.
