- Processor: 1+ GHz for cracks
- RAM: Enough for patching
- Disk space: At least 64 GB

A program for capturing traffic on 802.11a / b / g / n networks alongside some powerful features regarding packets as well as nodes. Network traffic monitoring is a task that requires specialized tools and a specialist to interpret the data, so this means it is an undertaking only for professionals. Thing may be even more complicated if the tracked network is a wireless one, because hardware and software compatibility and communication plays an important role.
