

Connectify Hotspot License[Activated] [Clean] [x86-x64] [Stable] Reddit

Description

Hash-sum 7c8a5c0806627f88d0bdfd34e058cbb6

Updated on 2025-12-21

- Processor: 1 GHz CPU for patching
- RAM: 4 GB to avoid lag
- Disk space: Free: 64 GB

Create a WiFi hotspot with ease featuring a wide array of settings for connection sharing as well as connection security with support for WEP and WPA2. Setting up a wireless network is usually done using a dedicated router, but there is a specialized application, called Connectify Hotspot, that can do that without needing the hardware device. This software can turn your wireless-capable computer into a virtual router, thus allowing you to use the same Internet connection on multiple devices.
