Update date: 2026-05-01

- **Processor:** At least 1 GHz, 2 cores
- **RAM:** 4 GB or higher
- **Disk space:** At least 64 GB

CorelDRAW is a software application used for vector graphics design and illustration. It supports vector, raster, typography, and page design workflows. It offers color management, accurate control, and non-destructive editing. Tailored for logos, branding, signage, and printed designs. It contains multi-page layouts, customizable workspaces, and wide file support. Valued for flexibility, quickness, and an intuitive interface.
