- **CPU:** modern architecture (**Zen 3 / Alder Lake** minimum)
- **RAM:** high-speed **DDR5** memory preferred
- **Disk Space:** 80 GB **NVMe SSD** required
- **Graphic Processor:** hardware **Ray Tracing** support needed

Play as a supernatural assassin to reclaim a stolen coastal throne from a ruthless, magically empowered political usurper. Seamlessly combine brutal stealth assassinations, fluid parkour traversal, and dark mystical powers like teleportation or summoning violent rat swarms. Navigate extraordinary, systemically dense sandbox levels including a moving clockwork mansion and an atmospheric dust district plagued by warring factions. The game reacts entirely to your playstyle, shifting the regional

chaos levels, conversation options, and ultimate narrative conclusions based on your body count.
