- Processor: Dual-core for keygens
- RAM: Enough for patching
- Disk space: 64 GB for unpack

Automated proofreader and grammar checker with plagiarism detection features, enabling you to evaluate the overall quality of your documents. Spelling and grammar mistakes suggest a lack of attention or care from the writer's part, so eliminating them from a document is rather important. The

Office suite comes with its own, integrated text proofing and auto-correct tools, but there are also other alternatives that you can try out in order to get the best results.
