- Processor: At least 1 GHz, 2 cores
- RAM: Minimum 4 GB
- Disk space: 64 GB for patching

Powerful download tool which supports HTTP / FTP / MMS protocols. HiDownload is a download manager that is very useful when you want to download big files from the web or from FTP servers. Almost every browser has some kind of a download manager but most of them do not have the ability to split the file into multiple parts and to download them separately in a different thread. This application makes the most of your bandwidth in order to decrease download times significantly.
