Microsoft Office is a powerful collection for work, study, and creative tasks.

Globally, Microsoft Office is recognized as a leading and reliable office productivity suite, offering everything necessary for proficient handling of documents, spreadsheets, presentations, and much more. Fits well for both industry professionals and casual use in your residence, school environment, or work setting.

What's part of the Microsoft Office package?

Skype for Business

Skype for Business is a platform for corporate communication, online meetings, and collaboration, that integrates instant messaging, voice and video calls, conferencing, and file exchange in the context of one protected solution. Based on classic Skype, but refined for business communication, this solution supplied companies with tools for efficient internal and external communication based on the company's guidelines for security, management, and integration with other IT systems.

Power BI

Power BI by Microsoft is a robust platform for business intelligence and data visualization created to turn disorganized information into intuitive, interactive reports and dashboards. The instrument is tailored for analysts and data specialists as well as for routine users looking for straightforward analysis solutions without technical expertise. Using Power BI Service in the cloud, reports are published with ease, refreshed and reachable across the globe on multiple devices.

Microsoft Publisher

Microsoft Publisher is a budget-friendly and straightforward desktop layout software, focused on developing professional visual content for print and digital platforms refrain from using complicated graphic software. Unlike conventional text manipulation programs, publisher allows for more precise placement of elements and easier design adjustments. The tool features a wide range of ready-made templates and configurable layout designs, which empower users to start working immediately without design knowledge.
