Microsoft Office is a powerful software suite for work, study, and artistic expression.

Microsoft Office is among the most widely used and trusted office suites globally, equipped with everything required for productive work with documents, spreadsheets, presentations, and additional tools. Perfect for professional projects and everyday errands â?? in your house, classroom, or office.

What is offered in the Microsoft Office package?

Microsoft Excel

Microsoft Excel is a highly powerful and multifunctional program for processing numerical and spreadsheet data. It is employed around the world for report creation, data analysis, predictive analytics, and data visualization. Owing to its comprehensive set of toolsâ??from simple arithmetic to complex formulas and automationâ?? Excel is ideal for routine activities and expert analysis in corporate, scientific, and academic contexts. The program simplifies the process of making and editing spreadsheets, customize the formatting of the data, then sort and filter it accordingly.

Microsoft Publisher

Microsoft Publisher provides an affordable and straightforward solution for desktop publishing, focused on the creation of sleek and professional printed and digital media no need to rely on advanced graphic programs. Unlike conventional text editors, publisher gives users more liberty in positioning items and customizing their design. The software provides an assortment of pre-designed templates and adjustable layouts, that permit users to quickly begin tasks without design proficiency.

Skype for Business

Skype for Business is an enterprise solution for communication and remote interaction, which merges instant messaging, calls (voice and video), conference features, and file sharing options within a unified secure system. Built as an enhancement of standard Skype, aimed at professional settings, this system enabled companies to communicate effectively both internally and externally taking into account the companyâ??s security, management, and integration standards with other IT systems.

Power BI

Microsoft Power BI offers a powerful solution for business intelligence and visual data analysis intended to convert fragmented data into understandable, interactive dashboards and reports. The technology is intended for analysts and data professionals, and also for typical users who need easy-to-use analysis tools without technical complexity. Reports can be easily shared thanks to the Power BI Service cloud platform, refreshed and available globally on multiple gadgets.
