Microsoft Office is a dynamic suite for work, education, and artistic projects.

Microsoft Office ranks as one of the most trusted and widely used office software worldwide, including everything you need for smooth operation with documents, spreadsheets, presentations, and other tasks. Works well for both industrial applications and personal use â?? at home, attending classes, or working.

What comes with Microsoft Office?

Microsoft Teams

Microsoft Teams is a powerful platform for chatting, collaborating, and conducting video conferences, crafted as a flexible tool for teams regardless of size. She has established herself as a core element of the Microsoft 365 ecosystem, uniting all communication and collaboration toolsâ??chats, calls, meetings, files, and integrationsâ??in a single workspace. Teamsâ?? essential idea is to provide users with an all-in-one digital center, a dedicated space for chatting, coordinating tasks, holding meetings, and editing documents collaborativelyâ??inside the app.

Power BI

Microsoft Power BI offers a powerful solution for business intelligence and visual data analysis designed to transform scattered information into clear, interactive reports and dashboards. The tool is suitable for analysts and data experts, and for non-expert users who need intuitive analysis tools without requiring technical proficiency. Power BI Service cloud enables simple and efficient report publishing, refreshed and available globally on multiple devices.

Microsoft PowerPoint

Microsoft PowerPoint is a renowned tool for crafting visual presentations, combining ease of use with powerful tools for professional formatting and presentation. PowerPoint is suitable for both beginners and experienced users, involved professionally in business, education, marketing, or creative fields. The software presents a comprehensive suite of tools for inserting and editing. text content, visuals, tables, graphs, icons, and videos, for use in transitions and animations as well.
