Microsoft Office provides the tools for work, learning, and artistic pursuits.

Microsoft Office is among the most widely used and trusted office suites globally, offering all the tools required for productive management of documents, spreadsheets, presentations, and other functions.

Fits both professional requirements and everyday needs â?? whether youâ??re at home, in class, or at your job.

What is included in the Microsoft Office subscription?

Power BI

Microsoftâ??s Power BI serves as a powerful tool for business intelligence and data visualization meant to convert unstructured information into user-friendly, interactive reports and dashboards. The system is tailored for analysts and data specialists, catering to everyday consumers who look for simple, easy-to-understand analysis tools without technical knowledge. The cloud-based Power BI Service simplifies the process of publishing reports, updated and accessible from anywhere in the world using different devices.

Microsoft Access

Microsoft Access is a versatile database management tool used for designing, storing, and analyzing structured datasets. Access is versatile enough for developing both small local data stores and comprehensive business platforms â?? to maintain records of clients, inventory, orders, or financial activities. Seamless integration with Microsoft tools, for example, Excel, SharePoint, and Power BI, promotes more effective data processing and visualization. Because of the combination of high performance and low cost, Microsoft Access continues to be an ideal solution for users and organizations requiring dependable tools.

Microsoft Publisher

Microsoft Publisher offers an intuitive and affordable desktop publishing experience, specialized in designing professional print and digital materials no need to use complex graphic software. Unlike standard text manipulation tools, publisher provides more flexibility in positioning elements accurately and designing layouts. The platform offers a rich selection of templates and flexible, customizable layouts, that support users in quickly launching projects without design expertise.

Microsoft Visio

Microsoft Visio is a specialized application for creating diagrams, charts, and visual models, useful for showing elaborate information in an accessible and structured form. It is necessary wherever processes, systems, and organizational structures must be illustrated, diagrams of technical drawings or IT infrastructure architecture in visual format. The application offers a broad library of pre-designed elements and templates, quick to transfer onto the workspace and link with other components, forming logical and readable diagrams.
