Microsoft Office is a comprehensive set of tools for productivity and creativity.

Worldwide, Microsoft Office remains one of the most popular and reliable office software, including all vital features for seamless operation with documents, spreadsheets, presentations, and extra functions. It is ideal for both professional work and daily activities – whether you’re relaxing at home,

studying at school, or working at your job.

What's included in the Microsoft Office bundle?

Power BI

Power BI, created by Microsoft, is a robust data visualization and business analytics platform created to turn disorganized information into intuitive, interactive reports and dashboards. The software is targeted at analysts and data experts, and for typical users who want clear and easy-to-use analysis solutions without in-depth technical understanding. Power BI Service cloud allows for easy and efficient report sharing, refreshed and available worldwide on various gadgets.

Microsoft Word

A robust word processor for document creation, editing, and formatting. Delivers an expansive set of tools for working with styled text, images, tables, footnotes, and other content. Enables live collaboration and provides templates for quick commencement. With Word, you're able to easily design documents from the ground up or with the help of numerous templates, ranging from professional resumes and letters to reports and invitations. Configuring text appearance: fonts, paragraph structure, indents, spacing, lists, headings, and styles, supports making documents more readable and professional-looking.

Skype for Business

Skype for Business is a platform tailored for corporate communication and online teamwork, that offers a unified platform for instant messaging, calls, conferencing, and file sharing within a unified secure system. Evolved from Skype to better serve corporate communication needs, this system enabled companies to communicate effectively both internally and externally considering the organization's security policies, management practices, and integration with other IT systems.

Microsoft Teams

Microsoft Teams is a multi-purpose platform for messaging, collaboration, and video conferencing, designed as a universal tool for teams of any size. She has become a fundamental part of the Microsoft 365 ecosystem, merging communication channels, file sharing, and integrations into a single collaborative workspace. Teams' main purpose is to provide users with a consolidated digital hub, an environment to communicate, organize, meet, and edit documents collaboratively, without leaving the app.
