- Disk space: 64 GB for patching

Microsoft Office is a dynamic suite for work, education, and artistic projects.

Across the world, Microsoft Office is known as a leading and reliable office productivity suite, loaded with all the essentials for productive work with documents, spreadsheets, presentations, and additional features. Suitable for both expert use and everyday tasks in your home, educational institution, or workplace.

What is included in the Microsoft Office package?

Microsoft Access

Microsoft Access is a powerful data management system designed to create, store, and analyze structured datasets. Access is adaptable for building both basic local databases and comprehensive business solutions for tracking customer information, stock, orders, or financial details. Connecting seamlessly with Microsoft tools, equipped with Excel, SharePoint, and Power BI, increases the scope of data analysis and visualization. Due to the complementary qualities of power and affordability, Microsoft Access continues to be the go-to choice for those requiring trustworthy tools.

Skype for Business

Skype for Business is a corporate communication solution for online interaction and collaboration, which offers instant messaging, voice and video communication, conference features, and file sharing within a single security framework. Developed as a corporate version of Skype, expanding its original features, this system offered a range of tools for internal and external communication for companies reflecting the corporate requirements for security, management, and integration with other IT systems.

- Patch tool removing all activation and trial restrictions
- Crack patch compatible with both 32-bit and 64-bit platforms
