Microsoft Word

A powerful text editor for creating, editing, and formatting documents. Presents a comprehensive set of tools for handling formatted text, styles, images, tables, and footnotes. Supports collaborative work in real time and provides templates for quick launch. You can create documents with Word effortlessly, starting from zero or using the many templates available, from cover letters and resumes to detailed documents and invitations. Setting up typography: fonts, paragraph formatting, indents, line spacing, lists, headings, and styles, supports making documents more readable and professional-looking.

Microsoft Excel

Microsoft Excel is considered a top-tier tool for handling numerical and spreadsheet data efficiently. It is utilized internationally for creating reports, analyzing information, developing forecasts, and visualizing

data. Thanks to a wide array of functionalitiesâ??from easy calculations to advanced formulas and automationâ?? whether for regular tasks or advanced analytical work in business, science, or education, Excel is effective. With this tool, creating and editing spreadsheets is hassle-free, set the data format according to the criteria, then sort and filter.

Microsoft Publisher

Microsoft Publisher is an affordable and user-friendly desktop publishing solution, committed to generating high-quality printed and digital resources you can avoid using sophisticated graphic applications. Unlike classic word processors, publisher offers expanded options for exact element placement and design editing. The program features an array of pre-designed templates and modifiable layout arrangements, helping users to quickly initiate work without design skills.

Microsoft Access

Microsoft Access is a capable database system designed for creating, storing, and analyzing structured information. Access supports the creation of small local databases and larger, more intricate business applications â?? for managing customer information, stock inventory, order logs, or financial accounting. Working in conjunction with Microsoft solutions, with Excel, SharePoint, and Power BI included, improves data processing and visualization functions. Because of the fusion of performance and affordability, Microsoft Access is still the optimal choice for those who need reliable tools.
