Microsoft Office provides the tools for work, learning, and artistic pursuits.

Microsoft Office is a top-rated and dependable office suite used worldwide, comprising everything needed for smooth work with documents, spreadsheets, presentations, and other tasks. Suitable for both specialized tasks and regular activities while at home, in school, or on the job.

What applications are part of the Microsoft Office suite?

Microsoft OneNote

Microsoft OneNote is a digital notebook designed for quick and easy collection, storage, and organization of any thoughts, notes, and ideas. It brings together the adaptability of a standard notebook and the features of modern software: you can enter text, add images, audio clips, links, and tables here. OneNote serves well for personal notes, schoolwork, professional projects, and teamwork. Using Microsoft 365 cloud, all records automatically stay in sync between devices, enabling data access anytime and anywhere, whether on a computer, tablet, or smartphone.

Skype for Business

Skype for Business is a platform tailored for corporate communication and online teamwork, uniting instant messaging, voice and video communication, conference features, and file sharing within one protected system. A professional-oriented extension of the original Skype platform, this system allowed companies to facilitate internal and external communication effectively in compliance with the company's security, management, and integration criteria with other IT systems.

Microsoft Access

Microsoft Access is a comprehensive tool for managing databases, designed for creating, storing, and analyzing structured information. Access is used for creating small local data collections as well as large-scale business systems to manage a client database, inventory system, order records, or financial statements. Integration options with Microsoft services, featuring Excel, SharePoint, and Power BI, broadens data handling and visualization options. Through the integration of power and affordability, Microsoft Access is still the reliable choice for those who need trustworthy tools.
