Access a wide library of professionally designed templates for polished presentations.

- **SharePoint document integration**

Provides seamless access to shared files and version control for team collaboration.

- **Smart autofill in Excel**

Predicts and continues data entry patterns using AI.

- **Version history and file recovery**

Access and restore previous versions of files stored in OneDrive or SharePoint.

- **Advanced PowerPoint animations**

Use advanced animation effects and transitions to enhance presentations.

Microsoft Access

Microsoft Access is a flexible database system intended for creating, storing, and analyzing structured information. Access is versatile enough for developing both small local data stores and comprehensive business platforms â?? to maintain records of clients, inventory, orders, or financial activities. Integration capabilities with Microsoft solutions, involving Excel, SharePoint, and Power BI, advances data handling and visualization techniques. Because of the combination of high performance and low cost, for users and organizations in search of reliable tools, Microsoft Access is the ideal solution.

Microsoft Outlook

Microsoft Outlook is a leading email client and personal organizer software, optimized for managing electronic mails efficiently, calendars, contacts, tasks, and notes accessible through a streamlined

interface. He has been recognized for years as a dependable platform for business communication and organization, in a corporate context, focusing on efficient time use, organized messaging, and team collaboration. Outlook facilitates extensive email management capabilities: from organizing emails through filtering and sorting to automating responses, categories, and processing rules.

Power BI

Power BI is a leading platform from Microsoft for business intelligence and visual data insights created to turn disorganized information into intuitive, interactive reports and dashboards. It is meant for analysts and data professionals, targeting non-technical users who need accessible tools for analysis without deep technical understanding. The Power BI Service cloud makes report publishing quick and convenient, updated and available internationally across different devices.
