- Processor: 1 GHz CPU for patching
- RAM: 4 GB for tools
- Disk space: Required: 64 GB

Intuitive solution that lets users tune into TV and radio channels from all over the globe, while also offering additional features for a more complete experience. The age of digital TV and radio may be past its prime for younger audiences, but it's not going anywhere in the foreseeable future. Among TV watchers, it's actually pretty common to feel there's barely anything worth watching, and the same holds true for radio enjoyers: aside from the content's general quality, your region and provider play an important role.
