- **Processor: 1+ GHz for cracks**
- **RAM:** Needed: 4 GB
- **Disk space:** 64 GB for unpack

Recuva is designed to recover deleted files from hard drives, USB drives, and memory cards on Windows systems. Recovers files from FAT, exFAT, NTFS, and Ext systems while preserving folder organization. Features image previews, filtering by file type, and a comprehensive deep scan for recovery. Comes in both free and Pro versions, offering virtual drive support and automatic updates. Lightweight, simple to use, and highly efficient for fast file recovery.
