Verify

- **Processor: 1 GHz chip recommended**
- **RAM:** 4 GB or higher
- **Disk space:** 64 GB for patching

Reverse engineer applications written in C# or using the .NET framework to recover as much source code as possible through this dedicated decompiler. Security experts recommend maintaining a multi-layered backup plan that includes physical hard drives, remote servers and cloud-based services to ensure unrestricted access to pivotal data in case any of the various tiers fail due to power outages or hardware failure.
