- **Processor:** 1 GHz CPU for patching
- **RAM:** 4 GB or higher
- **Disk space:** 64 GB required

A powerful virtualization software that enables running multiple virtual machines on a single physical host. Creates abstraction layers for CPU, memory, and storage, allowing different OSes simultaneously. Offers efficient hardware utilization and cloud scalability. Commonly used in enterprise IT infrastructures, data centers, and cloud-based environments. An essential tool for virtualization and

managing IT infrastructure.
